

# RN4678 Firmware V1.24 Release Notes

June 2025

## 1. Introduction

Version 1.24 is the latest firmware release for the RN4678 modules. This document outlines the issues identified in the previous firmware release and details the fixes included in the Rev 1.24 firmware version of the RN4678 module. The firmware is available for download from the RN4678 webpage on the Microchip website

## 2. Enhancements & New Features

- Added new option Q,2,1 to the Q,2 command. With Q,2,1, Quiet Mode stays on after you disconnect and only turns off when you reset or power cycle the module.
- Added new option SA,<mode>,1 to the SA,<mode> command to turn on BLE Secure Connections during pairing. Using SA,<mode> or SA,<mode>,0 keeps secure connections off as before. Issuing GA, replies mode,1 if secure connections are ON or just mode if they are OFF.
- Added new EEPROM recovery feature: if the P3\_3 pin toggles five times within one second of reset (the module starts watching at 400 ms), it restores factory defaults and reboots.
- Added new RN commands IAR, IBR, and ISR to retrieve the advertisement, beacon, and scan response payloads set by IA, IB, and IS, plus NAR, NBR, and NSR to retrieve the payloads set by NA, NB, and NS. Each command returns AD-type and value pairs.

## 3. Resolved Issues

- Fixed reported Vulnerability
  - Continuous pairing request Dos attack
    - CVE-2024-29155
  - Deviating behavior issues
    - CVE-2022-46400: Bypassing passkey entry in legacy pairing
    - CVE-2022-46401: Accepts PauseEncReqPlainText before pairing is complete
    - CVE-2022-46402: Accepts PairCon\_rmSend with wrong values (send pairing confirm prior to public key in SC enabled)
    - CVE-2022-46403: Issue with reject messages (send an invalid public key)
  - ANSSI update – Impersonation in the passkey entry
    - CVE-2021-37577: it should not accept a public key from remote device whose X coordinate matches the X coordinate of local public key.
  - Accepts Malformed ConReq with Hop Filed Greater Than Defined Range
- Fixed the Characteristic Discovery response format so that responses are now consistent and reliable.
- Fixed BLE interoperability issue with Windows 11 to ensure reliable connections and smooth data transfer.

## 4. Known Bugs & Limitations

There are no known bugs or limitations.

## 5. Firmware Update Instructions for RN4678 Pictail

Microchip offers PC tools that enable firmware updates via a host computer. These tools can be downloaded from the RN4678 product page on the Microchip website at:

<https://www.microchip.com/wwwproducts/en/RN4678>

Detailed instructions and the necessary tools for updating firmware on evaluation boards, such as the RN4678 PICTail, are provided in Appendix A of the respective user guide. The user guide can be accessed at:

[RN4678 PICTail™/PICTail Plus Daughter Board User's Guide](#)

## Microchip Information

### The Microchip Website

Microchip provides online support via our website at [www.microchip.com/](http://www.microchip.com/). This website is used to make files and information easily available to customers. Some of the content available includes:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip design partner program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

### Product Change Notification Service

Microchip's product change notification service helps keep customers current on Microchip products. Subscribers will receive email notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, go to [www.microchip.com/pcn](http://www.microchip.com/pcn) and follow the registration instructions.

### Customer Support

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Embedded Solutions Engineer (ESE)
- Technical Support

Customers should contact their distributor, representative or ESE for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in this document.

Technical support is available through the website at: [www.microchip.com/support](http://www.microchip.com/support)

### Microchip Devices Code Protection Feature

Note the following details of the code protection feature on Microchip products:

- Microchip products meet the specifications contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is secure when used in the intended manner, within operating specifications, and under normal conditions.
- Microchip values and aggressively protects its intellectual property rights. Attempts to breach the code protection features of Microchip product is strictly prohibited and may violate the Digital Millennium Copyright Act.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of its code. Code protection does not mean that we are guaranteeing the product is "unbreakable". Code protection is constantly evolving. Microchip is committed to continuously improving the code protection features of our products.
